

## Online Tutoring - Future Of Education Industry

*Over the period now online tutoring has took the educational industry by storm. Online tutoring companies are located all over the globe but mainly in Asian countries like India & Pakistan.*

(1888PressRelease) October 24, 2007 - The Internet technology has revolutionized many parts of our economy now days. You can now shop, meet people online and can take college courses for credit too. Now a day's information can easily flow from one part to other within a blink of an eye. The knowledge now a days is no longer been confined to the educational institutions. This is a world of Internet technology where two persons can interact with each other sitting thousands

of miles away. People from two different worlds can now meet online where they can interact with each other through video conferencing.

"I was really very worried about my daughter Jane as she was not performing up to the standards. Then some of my office colleagues suggested private tuitions but it was difficult for me to afford it as it was very expensive." Says Maurine Pitt, mother of Jane, "Firstly I was skeptic about these tutors from India but at last I thought of giving it a try to it and surprisingly I got good results. From C's to B's and now A's Jane has sailed a long way and reached great heights. Thanks to online tutoring! "

"It's made a big difference.

My daughter, Cindy is at the top in each and every of her subject. I cannot believe that she has improved so much. In fact, now days she is able to concentrate on her guitar classes too," said Jennifer, a single mother from Fresno, California.

The best thing these companies provide is flexibility. Students get more time to get involved in extra co-curricular activities and get more time to sleep as well. This leads to interest in the subject and full concentration.

In online tutoring, virtual classrooms are packed up with an electronic whiteboard, voice and chat (instantly). In this live one-on-one online tutoring, students have access to lessons, practice

tests, worksheets and animations to help them master a course subject.

Online tutoring companies require tutors to have a master's degree and sufficient teaching experience in the subject they are going to teach. These companies train the tutor for a number of weeks, assess their performance, and take feedback from parents. Almost each and every tutor has about ten years of experience.

Private tutors are like an extravagance, for many American families cannot afford them. These private tutors cost anywhere from \$ 50 to \$ 100 an hour.

"Our aim remains to provide the best education at the most affordable cost. We tend

to decrease the distances between teacher and student by providing them our platform of online tutoring. The teachers are recruited and trained up to the highest industry standards. We foresee e-tutoring as the future of education industry in the times to come. Online tutoring business is expanding day by day. The online tutoring industry is the latest buzz in the education industry and is providing the American parent a magic tool kit, which they had always dreamt for their kids
